
Sperm DNA Damage can cause Miscarriages

SpermComet[®]
The Next Generation Test For Men's Health

SPERM DNA TESTING

There is a direct link between miscarriages and sperm DNA damage.

Around a quarter of all couples will experience the emotional heartache of miscarriage at some time. While many of these will be a single sporadic event, some couples will suffer repeated – or recurrent – miscarriages.

Sperm DNA Tests have shown that **nearly all couples experiencing recurrent miscarriage tested had sperm DNA damage.**

Men can make simple lifestyle changes to improve their Sperm DNA when given the right information, in turn improving the chances of a healthy baby.

SpermComet® reveals your Sperm DNA Health.

To find out more about the SpermComet® test you can talk to your **Doctor**.
